SUMMARY

Senior Software Engineer with 7 years of experience building scalable enterprise and AI-driven applications using React.js, TypeScript, and Node.js. Experienced in enterprise POS systems, healthcare platforms, legacy modernization, and distributed architectures. Strong expertise in frontend engineering, performance optimization, scalable application design, and AI-assisted development workflows. Experienced leading teams, delivering production-grade solutions, and collaborating across cross-functional environments in agile development ecosystems.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java
Frontend	React.js, Vue.js, Next.js, Redux, Material UI, CSS
Backend and Database	Node.js, Express.js, REST APIs, MySQL, MongoDB, Redis
Cloud & Infrastructure	Docker, Kubernetes, AWS, CI/CD
Tools	Git, JIRA, Agile Practices, Scrum, Performance Optimization
AI-Assisted Development	GitHub Copilot, Claude, Copilot CLI, Cursor, Antigravity
Domain Expertise	System Design, POS, Healthcare, Retail, Legacy Modernization

EXPERIENCE

NCR Voyix Mar 2025 - Present

Senior Software Engineer

- Contributing to modernization of enterprise POS systems used in large-scale retail environments.
- Migrating legacy UI and API systems into scalable modern architectures using AI-assisted development systems.
- Working with React.js, TypeScript, Docker, and Kubernetes in enterprise-grade distributed environments.
- Analyzing and debugging complex production issues across integrated POS ecosystems.
- Collaborating with cross-functional teams on transaction workflows, peripheral integrations, and operational systems.
- Improving development efficiency using GitHub Copilot and Claude for migration and development workflows.

Tech Stack: React.js, TypeScript, Vue.js, Docker, MySQL, GitHub Copilot, POS Systems.

Thinkhat Software Dec 2022 - Feb 2025

Senior Software Engineer

- Led a team of 8 in building scalable AI-driven healthcare application features in agile environments.
- Delivered scalable healthcare application features for production environments by collaborating with distributed teams across critical application modules.
- Developed reusable and performance-optimized modules for patient and clinical workflows using React.js and TypeScript.
- Improved development through structured code reviews and agile practices, ensuring better collaboration and delivery quality.
- Worked closely with product, backend, and QA teams to ensure smooth delivery of production-ready features.

Tech Stack: React.js, TypeScript, Redux, Node.js, Healthcare Systems, FHIR.

Infistack

Mar 2022 - Dec 2022

Software Consultant

- Delivered scalable ERP UI solutions supporting complex industrial workflows for a Finland-based client, improving usability and operational efficiency across business-critical modules.
- Collaborated directly with clients to gather requirements and deliver production-ready solutions.
- Participated in requirement analysis, solution planning, and application delivery.

Tech Stack: React.js, JavaScript, ERP Systems, Client Communication.

Soffront Corporation

Sep 2021 - Mar 2022

Software Engineer

- Supported development and maintenance of enterprise systems with complex business logic and application flows.
- Assisted in debugging, optimization, and maintenance of complex application modules.

Otechnonix India Pvt. Ltd.

Apr 2019 - Aug 2021

Software Developer

- Contributed to frontend and backend development of production-grade business applications, supporting reliable deployments and scalable feature delivery in agile environments.
- Worked on end-to-end web application development and deployment.

PROJECTS

Retail Enterprise Solutions MEX - nvPOS

NCR Voyix

Senior Software Engineer

- Contributed to modernization of enterprise POS systems used across retail environments, improving maintainability and reducing migration effort through AI-powered migration workflows.
- Enhanced legacy POS modules in production retail systems while contributing to scalable modernization initiatives using AI.

Noki AI

Thinkhat Software

Team Lead

- Provided an AI-powered healthcare platform designed to support doctors and patients with intelligent workflows.
- Built a scalable application focused on improving usability, performance, and AI-driven features.

Betonipumppaus ERP

Infistack

Software Consultant

- Developed a client-focused ERP system for an industrial business with complex operational workflows.
- Worked on building an enterprise application based on client requirements and business processes.

EDUCATION

MCA, Manipal University, Jaipur

Year - 2024

BCA, Nazira College

Year - 2018
